Washington, DC 20554

Dear The Federal Communications Commission,

To whom it may concern,

I have been noticed that every year or certain period of time you increase the rates. Personatly many people depend on you all for many reason but if you all keep on increasing the rates you will all loose many clients and I know that is what you all less want right now. But if you all keep your rates low you get more customers which mean more money but i truly hope you all will stope increasing the rates.

Sincerely,

Belki Cruz
